MAIN STACK

TYPESCRIPT REACT

Looking to evolve in the JavaScript ecosystem, I ended up focusing mainly on React since 2016. Using React Storybook, I like working with components with built-in CSS, providing a simpler solution to maintain component integrity, focusing on reuse, mitigating visual con icts.

REACT NATIVE

I have created a weather forecast application consuming an external API dealing with the device permissions and a CRUD application using Google Firebase as the Backend.

HTML / CSS / FIGMA

I am passionate about everything related to CSS, it's where I like to relax from time to time. I like to create styleguides, naming patterns, always aiming for scalability and maintainability.

PROFESSIONAL EXPERIENCE

2012 – Present
FRONTEND DEVELOPER
Intelie

During the pandemic my tech leader has needed to move to another project so I became the only frotend developer, for that reason the big challenge was to deal with the team reduction and the deadlines but keeping the code quality.

2006 - 2012
WEB DESIGNER - UX/UI
Myfreecomm

I designed and implemented interfaces focusing on user experiencie and responsive layouts.

DEGREES

SYSTEMS ANALYSIS AND DEVELOPMENT
UniCesumar Institute
